

## Solstice | Mirror

The Solstice Mirror captures an ethereal moment of alignment, a fraction of time when the Sun shines the brightest, and the longest. The stone is like the Earth, in an instance of stillness, embracing the mirror and the metal details, as warm rays of light. Evocative, detached from unnecessary complexity, the Solstice is in essence a celebration all the everlasting elements that surround us – time, matter, light – and of oneself, reflected.
